

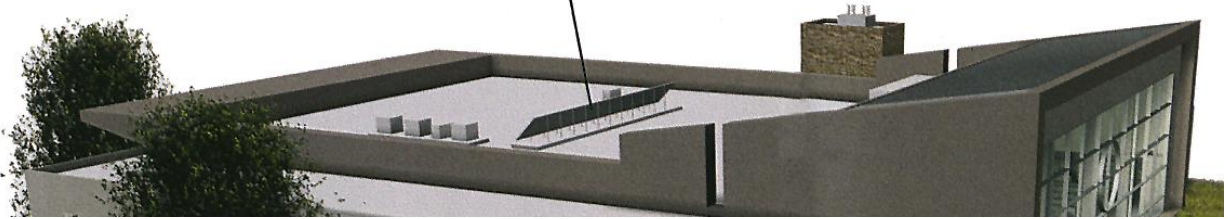

# PHOTOVOLTAIC SYSTEM

## PHOTOVOLTAIC PANELS

From Wikipedia, “Photovoltaics, or PV for short, is a solar power technology that uses solar cells or solar photovoltaic arrays to convert energy from the sun into electricity.” The PV panels on the Library can generate up to 2,550 watts.

Information on the building’s power needs and the amount of electricity being generated by the PV system are displayed in the monitors at the base of the main stairwell.
